Budget plan		
Description	**Cost (VAT included)**	
Balance for previous work	€	14 095,95
Maintenance, backup, connectivity, rettdatabasenetwork.org domain registration, https protocol, hosting, support for 2015	€	1 754,50
Database software improvements planned including data mining implementation and longitudinal data acquisition: a) improvement of the database software in a more user friendly manner in order to reduce the average time for filling patient information for each contributor. This will lead to an increase of data coverage that is essential for the purpouses of the database (epidemiological studies, genotype-phenotype correlation studies, outcome measures identifications); b) software implementation for longitudinal data acquisition for natural hystory studies of the disease and clinical trials; c) data mining system development and the interface implementation in order to display more data on the website (e.g. severity score of each patient or advanced statistical data) so that scientists and/or MDs can figure out if one given patient comply with the purpose of their studies	€	20 000,00
Total balance due	€	35 850,45
