College of Education
UNIVERSITY OF GEORGIA

WHO IS ELIGIBLE?

- Caregivers (18+) and individuals with Rett syndrome (5+) who use eye-tracking AAC devices for communication.
- Physicians and therapists who work with or have worked with individuals with Rett syndrome who use eye tracking AAC devices for communication.

DESCRIPTION OF STUDY

This study will investigate the use of eye-tracking AAC devices for accessing medical information from individuals with Rett syndrome. We will conduct interviews, ask for brief videos of use of the device for medical purposes, as well as collect pagesets and other texts.

INTERESTED?

If you are interested in participating, please go to <https://tinyurl.com/rettaacmed> or scan the QR code.
